Spare Parts, MRO & Obsolescence Management

Critical spares — even obsolete or hard to find.

OVERVIEW

When a part is missing, a whole unit can stop. COTI sources OEM spare parts and approved alternatives across all disciplines, identifies parts from nameplates or part numbers, and finds obsolete or hard-to-find items.

CONTENTS

13.1 OEM spare parts and technically acceptable alternatives subject to client approval.
13.2 Mechanical, electrical, instrumentation and automation spare parts.
13.3 Filters, bearings, seals, gaskets, belts, couplings, repair kits and consumables.
13.4 Valve, pump, compressor, motor, generator and process-equipment spares.
13.5 Part-number/nameplate identification, cross-reference research and obsolete-item sourcing.
13.6 Workshop tools, maintenance tools, consumables and shutdown/turnaround MRO packages.

13.1 OEM spare parts and technically acceptable alternatives subject to client...

SUPPLY SCOPE

OEM spare parts and technically acceptable alternatives subject to client approval.

DEFINITION

OEM (Original Equipment Manufacturer) parts are identical to the original components. Technically acceptable alternatives come from other manufacturers with equivalent performance; they are proposed with documentation and subject to client approval.

13.2 Mechanical, electrical, instrumentation and automation spare parts.

SUPPLY SCOPE

Mechanical, electrical, instrumentation and automation spare parts.

DEFINITION

COTI covers spare parts for all disciplines: mechanical (wear parts, internals), electrical (breakers, relays, motors), instrumentation (sensors, transmitters) and automation (controller cards, modules).

13.3 Filters, bearings, seals, gaskets, belts, couplings, repair kits and...

SUPPLY SCOPE

Filters, bearings, seals, gaskets, belts, couplings, repair kits and consumables.

DEFINITION

Consumable spares are replaced regularly: filters, bearings, seals, gaskets, belts, couplings and repair kits. Keeping them in stock avoids long waits during maintenance.

13.4 Valve, pump, compressor, motor, generator and process-equipment spares.

SUPPLY SCOPE

Valve, pump, compressor, motor, generator and process-equipment spares.

DEFINITION

COTI sources spares for valves, pumps, compressors, motors, generators and other process equipment, from single parts to complete assemblies.

13.5 Part-number/nameplate identification, cross-reference research and...

SUPPLY SCOPE

Part-number/nameplate identification, cross-reference research and obsolete-item sourcing.

DEFINITION

When only a nameplate or an old part number is available, COTI identifies the item, researches cross-references to current models and searches the market for obsolete or discontinued parts.

13.6 Workshop tools, maintenance tools, consumables and shutdown/turnaround MRO...

SUPPLY SCOPE

Workshop tools, maintenance tools, consumables and shutdown/turnaround MRO packages.

DEFINITION

COTI supplies workshop and maintenance tools, consumables and complete MRO packages prepared for shutdowns and turnarounds.

Specialized services are provided and/or coordinated with qualified technical partners according to project requirements.

Contact COTI

Send us your RFQ, part numbers, nameplate photos or technical specifications. We will review your requirement and reply with a structured proposal.
